

Arnica Montana 30C

A Homeopathic Formula Designed For Relief from Bruising & Swelling

Arnica Montana is a homeopathic remedy designed to reduce the discomfort, bruising and swelling associated with soft tissue injury that often accompanies a surgical procedure.

The literal interpretation of homeopathy is “like treating like”. The principle behind homeopathy is that our bodies have natural defense mechanisms to aid in healing. This is often reflected as symptoms. While prescription medications tend to suppress symptoms, homeopathic medications try to elicit them. This approach is intended to stimulate the immune system and enhance the healing process.

Arnica Montana was designed specifically for patients undergoing a reconstructive or cosmetic surgical procedure.

Directions

1. Begin taking just prior your procedure.
2. To ensure proper absorption, do not brush your teeth, eat or drink anything.
3. Do not handle the tablets.
4. Drop 4 tablets directly under the tongue and let dissolve naturally.
5. Take 4 tablets 2 times a day.
